BOARD OF GOVERNORS MEETING @ HR
TUESDAY, OCTOBER 14TH - 5:15 BEFORE THE MEETING

PRESIDENT'S CORNER

"Maintain to Sustain – Delivering ASHRAE's Sustainability Promise" – Bill Harrison, ASHRAE President, 2008-2009

Last month we had our first meeting of the year with a family social event that included a tour of the Homestead Creamery and free ice cream. Several of you took advantage of this, and brought your families with you, whom I enjoyed meeting and talking to.

My wife came along, and she actually told me that she really enjoyed and got a lot out of the evening. She liked learning about the different processes and seeing all of the machines the milk goes through before going into the grocery store's refrigerated display. She also like the farm because our guide discussed the more intricate details of a dairy farm that it is not just sitting on a stool and milking Bessie anytime one feels like it. Never in my wildest dreams would I thought that she would tell me that she enjoyed attending an ASHRAE event, so I am going to classify this meeting as being a success.

This month Tom Watson will be speaking about compressors and refrigerants. Environmental concerns, recent legislation, and LEED credit requirements have lead to the movement away from traditional refrigerants such as R-22 towards more environmental friendly refrigerants. Along with a discussion about compressor basics and application, Tom will also speak about what affect the new refrigerants have on compressor construction and selection.

Tom has deep roots in the world of compressors and refrigerants, and is sure to give a great presentation. I urge you to do what you can to come listen to this phenomenal source of information.

ASHRAE NEWS!

New Ventilation Design Requirements for Health Care Facilities Available from ASHRAE

ATLANTA – JUST LIKE THE RIGHT DOSE OF MEDICINE CAN IMPROVE HEALTH, PROPER VENTILATION IS AN INTEGRAL PART OF PATIENTS' WELL-BEING IN HEALTH CARE FACILITIES.

REQUIREMENTS TO ENSURE HIGH-QUALITY VENTILATION CAN BE FOUND IN A NEW STANDARD WRITTEN BY ASHRAE AND THE AMERICAN SOCIETY FOR HEALTHCARE ENGINEERING (ASHE). ANSI/ASHRAE/ASHE STANDARD 170-2008, VENTILATION OF HEALTH CARE FACILITIES, DEFINES VENTILATION SYSTEM DESIGN REQUIREMENTS THAT PROVIDE ENVIRONMENTAL CONTROL FOR COMFORT, AS WELL AS INFECTION AND ODOR CONTROL.

THE STANDARD IS THE FIRST ANSI STANDARD IN THE NATION TO SPECIFICALLY ADDRESS VENTILATION IN HEALTH CARE FACILITIES AND IS AVAILABLE FOR ADOPTION BY VARIOUS AUTHORITIES FOR HEALTH CARE FACILITY CONSTRUCTION SUCH AS CITY, STATE AND FEDERAL GOVERNMENTS AND BY PRIVATE NATIONAL ORGANIZATIONS SUCH AS THE FACILITIES GUIDELINES INSTITUTE AND THE JOINT COMMISSION ON THE ACCREDITATION OF HEALTHCARE ORGANIZATIONS (JCAHO). WITHOUT HIGH-QUALITY VENTILATION IN HEALTH CARE FACILITIES, PATIENTS, HEALTH CARE WORKERS AND VISITORS CAN BECOME INFECTED BY SIMPLY BREATHING.

"AIR-TRANSMITTED PATHOGENS CAN BE FOUND EVERYWHERE IN POORLY VENTILATED HEALTH CARE FACILITIES," RICHARD HERMANS, P.E., ASHRAE CERTIFIED HEALTHCARE FACILITY DESIGN PROFESSIONAL (HFDP), CHAIR OF THE COMMITTEE THAT WROTE THE STANDARD, SAID. "BECAUSE THESE ORGANISMS ARE FOUND IN HIGHER CONCENTRATIONS IN HOSPITALS AND BECAUSE PATIENTS ARE SUSCEPTIBLE TO THEM, ADDITIONAL CARE SHOULD BE TAKEN IN THE DESIGN OF VENTILATION SYSTEMS."

THE STANDARD ADDRESSES SYSTEMS AND EQUIPMENT; SPACE VENTILATION FOR A VARIETY OF AREAS IN HEALTH CARE FACILITIES, INCLUDING AIRBORNE INFECTION ISOLATION ROOMS, CRITICAL CARE UNITS, BURN UNITS, SURGERY ROOMS, AND CLASS B AND C OPERATING ROOMS; AND PLANNING, CONSTRUCTION AND SYSTEM STARTUP.

THE COST OF ASHRAE/ASHE STANDARD 170, VENTILATION OF HEALTH CARE FACILITIES, IS \$54 (\$43, MEMBERS).

NEW STANDARD PROVIDES GUIDANCE ON TESTING SEISMIC RESTRAINTS FOR HVAC&R EQUIPMENT

ASHRAE STANDARD 171-2008 PUBLISHED

ATLANTA – FORGET WHAT JERRY LEE LEWIS SAID; THERE'S *NOT* GOING TO BE A WHOLE LOTTA SHAKIN' GOING ON WITH A NEW STANDARD FROM THE AMERICAN SOCIETY OF HEATING, REFRIGERATING AND AIR-CONDITIONING ENGINEERS (ASHRAE). ANSI/ASHRAE STANDARD 171-2008, METHOD OF TESTING SEISMIC RESTRAINT DEVICES FOR HVAC&R EQUIPMENT, PROVIDES MANUFACTURERS A STANDARD WAY OF TESTING SUCH DEVICES TO PREQUALIFY PRODUCTS FOR EARTHQUAKE-PRONE AREAS.

"THIS STANDARD IS A BREAKTHROUGH FOR ASHRAE," SAYS JAMES TAUBY, CHAIR OF THE COMMITTEE THAT WROTE THE STANDARD. "THIS NEW NATIONAL STANDARD MOVES TESTING FROM THE WEST COAST TO THE ENTIRE UNITED STATES.

IT IS THE FIRST NATIONAL STANDARD FOR SEISMIC RESTRAINT TESTING OF NON-STRUCTURAL COMPONENTS THAT DOES NOT REQUIRE SHAKER TABLE TESTING, WHICH IS THE REQUIRED TESTING FORM IN MANY CALIFORNIA PROJECTS. STANDARD 171 PROVIDES PROVIDE STATIC-TEST PROCEDURES FOR DETERMINING THE CAPACITY OF SEISMIC RESTRAINTS FOR HVAC&R EQUIPMENT. THESE TEST PROCEDURES DETERMINE THE MAXIMUM FORCE A RESTRAINT CAN WITHSTAND WITHOUT BREAKAGE OR PERMANENT DEFORMATION.

MANUFACTURERS OF VIBRATION ISOLATORS, SEISMIC RESTRAINT VENDORS AND STRUT CHANNELS CAN USE THE STANDARD TO TEST THEIR PRODUCTS' SUITABILITY FOR STANDING UP TO EARTHQUAKE CONDITIONS, AND CONSULTING ENGINEERS CAN USE THE STANDARD AS A REFERENCE IN SPECIFICATIONS.

THE COST OF STANDARD 171-2008 IS \$39 (\$31, ASHRAE MEMBERS).
